1 Texas Housing Time Analysis

By: Brian Lee

1.1 Business problem:

As multiple markets like the streaming and tech companies are interested in Texas due to relatively low house prices and no income tax. We have been hired by a housing agency that is looking into investing into Houston, Texas early. This will allow for the company to better expect price jumps early, allowing for earlier buys at lower prices and selling at higher prices.

1.2 Data Preparation

In [1]:
```
# Import necessary packages
import pandas as pd
import numpy as np
import matplotlib as mpl
from matplotlib import pyplot as plt
%matplotlib inline
plt.style.use('seaborn-whitegrid')

import warnings
warnings.filterwarnings('ignore')
import itertools
import statsmodels.api as sm

from statsmodels.tsa.seasonal import seasonal_decompose
from statsmodels.graphics.tsaplots import plot_acf,plot_pacf
from pandas.plotting import autocorrelation_plot,lag_plot

from statsmodels.tsa.statespace.sarimax import SARIMAX
```

1.3 EDA and Visualization

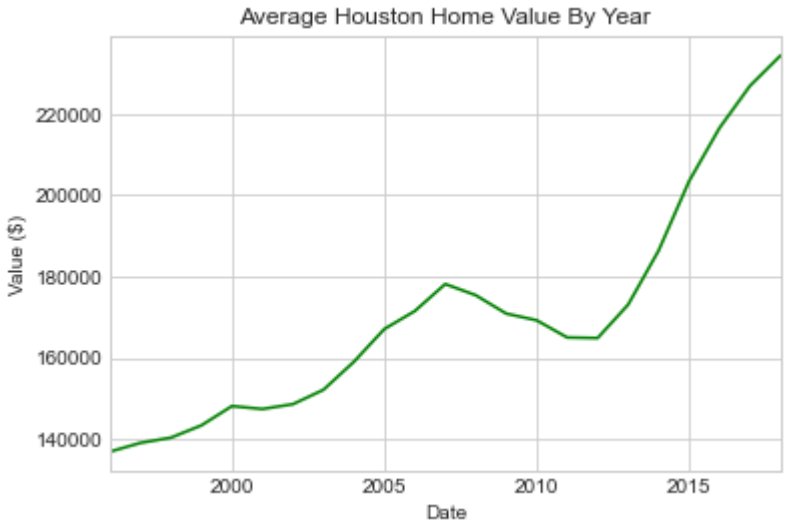
Questions we can ask:

1. How have Houston housing prices generally trended over time?
2. Which counties have higher home prices?
3. Which counties have the highest ROIs?
4. Which Zipcodes in Houston have the highest home prices?

1.3.1 How have Houston housing prices generally trended over time?

In [15]:
```
yearly_df = melt_df['Price'].resample(rule='A').mean()
yearly_df.plot.line(color='green')
plt.title('Average Houston Home Value By Year')
plt.ylabel('Value ($)')
plt.show()
```

executed in 222ms, finished 02:00:42 2021-08-08



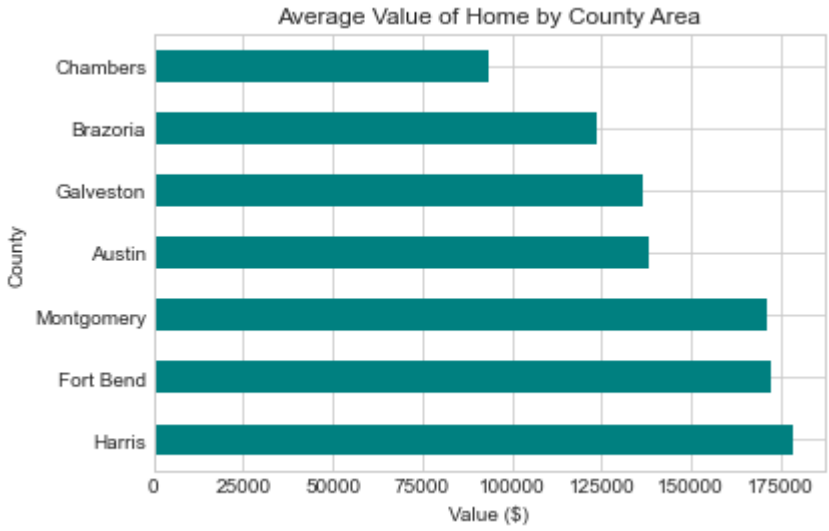
- Outside of the dip in housing prices between 2007 and 2011, the average price of a Texas

home has **steadily increased**.

1.3.2 Which counties have higher home prices?

In [16]:
```
county_df = melt_df.copy()
county_df = county_df.groupby('County').Price.mean().sort_values(ascending=False)
```
executed in 26ms, finished 02:00:42 2021-08-08

In [17]:
```
county_df.plot.barh(color='teal')
plt.title('Average Value of Home by County Area')
plt.xlabel('Value ($)')
plt.show()
```
executed in 169ms, finished 02:00:42 2021-08-08



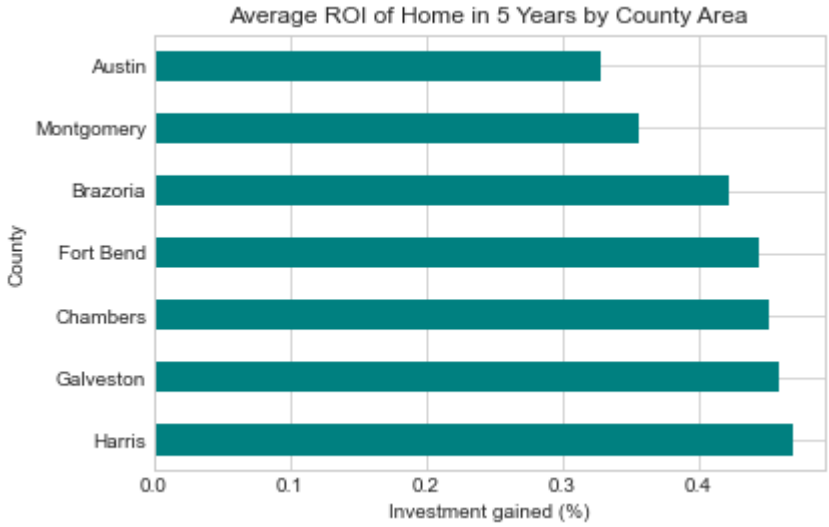
- **Harris, Fort Bend, and Montgomery** have clearly the highest average home values in the past 20 years.

1.3.3 Which counties have the highest ROIs?

In [18]:
```
# 5 year ROI
ROI_5_df = melt_df.copy()
ROI_5_df = ROI_5_df.groupby('County').ROI_5_years.mean().sort_values(ascending=Fa
```
executed in 14ms, finished 02:00:42 2021-08-08

In [19]:
```
ROI_5_df.plot.barh(color='teal')
plt.title('Average ROI of Home in 5 Years by County Area')
plt.xlabel('Investment gained (%)')
plt.show()
```

executed in 142ms, finished 02:00:42 2021-08-08

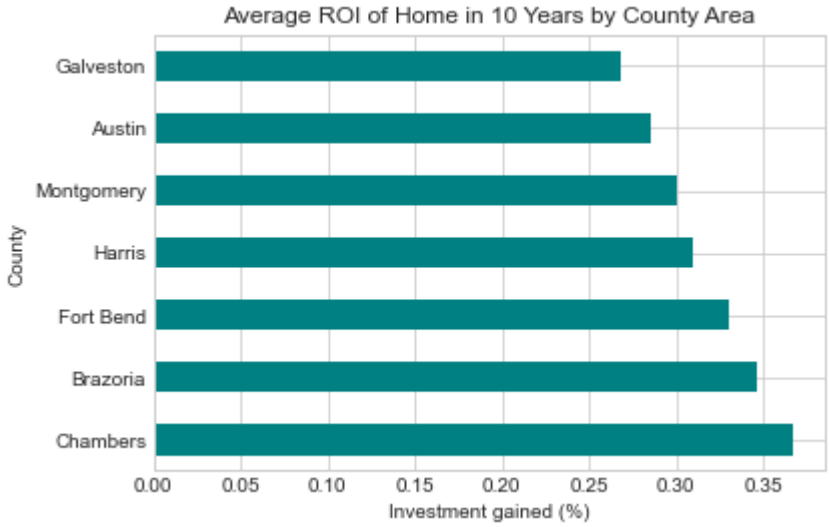


In [20]:
```
# 10 year ROI
ROI_10_df = melt_df.copy()
ROI_10_df = ROI_10_df.groupby('County').ROI_10_years.mean().sort_values(ascending
```

executed in 15ms, finished 02:00:42 2021-08-08

In [21]:
```
ROI_10_df.plot.barh(color='teal')
plt.title('Average ROI of Home in 10 Years by County Area')
plt.xlabel('Investment gained (%)')
plt.show()
```

executed in 205ms, finished 02:00:42 2021-08-08



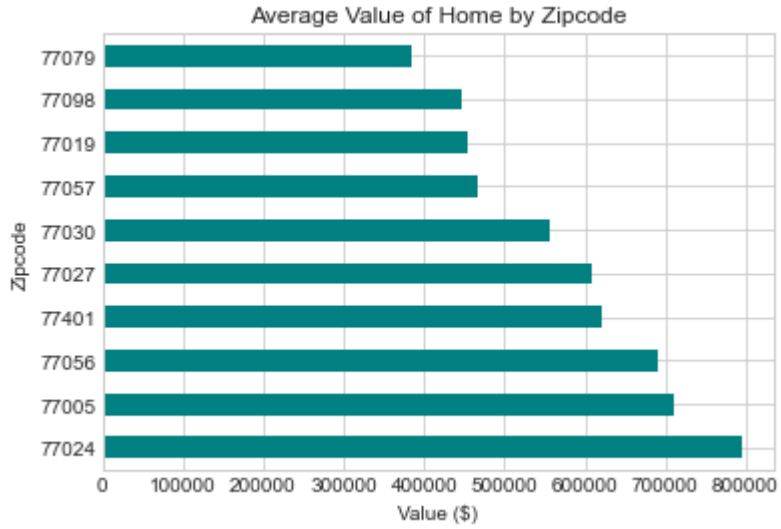
1.3.4 Which Zipcodes in Houston have the highest home prices?

In [22]:
```
zip_df = melt_df.copy()
zip_df = zip_df.groupby('Zipcode').Price.mean().sort_values(ascending=False).head
```

executed in 15ms, finished 02:00:42 2021-08-08

In [23]:
```
zip_df.plot.barh(color='teal')
plt.title('Average Value of Home by Zipcode')
plt.xlabel('Value ($)')
plt.show()
```

executed in 185ms, finished 02:00:42 2021-08-08



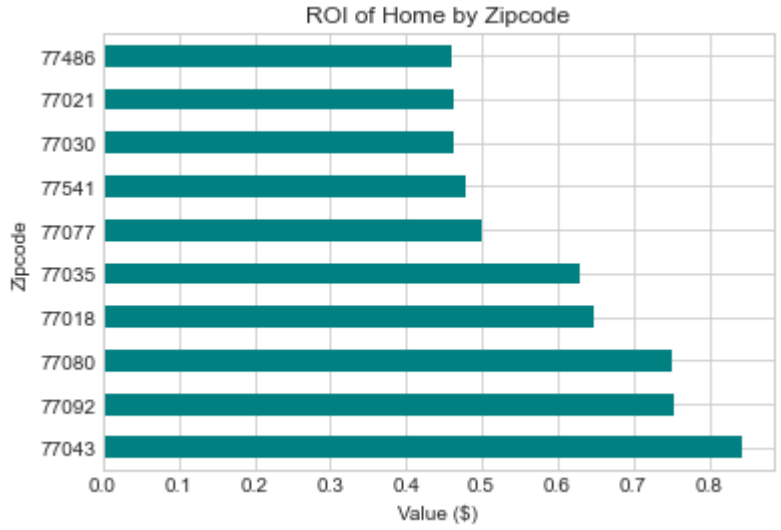
- **77024** appears to be the zipcode with the Highest average home value in the past 20 years.

In [24]:
```
zip_df = melt_df.copy()
zip_df = zip_df.groupby('Zipcode').ROI_10_years.mean().sort_values(ascending=Fals
```

executed in 14ms, finished 02:00:42 2021-08-08

In [25]:
```
zip_df.plot.barh(color='teal')
plt.title('ROI of Home by Zipcode')
plt.xlabel('Value ($)')
plt.show()
```

executed in 173ms, finished 02:00:43 2021-08-08



1.4 Time Series Modeling

```
------------------------------------------------------------
```

Best 3 Zipcodes appear to be:

- 77043
- 77018
- 77541

Looking at the models, theses Zipcodes have less a chance of decline with still great possibilities of the home price increasing.

1.5 Results

In [47]:
```
houston_df[houston_df['RegionName'] == 77043]
```
executed in 31ms, finished 02:01:12 2021-08-08

Out[47]:

	RegionName	City	CountyName	1996-04	1996-05	1996-06	1996-07	1996-08	1996
4654	77043	Houston	Harris	123400.0	123300.0	123300.0	123500.0	123800.0	1243(

1 rows × 270 columns

In [48]:
```
houston_df[houston_df['RegionName'] == 77018]
```
executed in 30ms, finished 02:01:12 2021-08-08

Out[48]:

	RegionName	City	CountyName	1996-04	1996-05	1996-06	1996-07	1996-08	1996
3380	77018	Houston	Harris	182500.0	185900.0	189100.0	191700.0	193400.0	1943(

1 rows × 270 columns

In [49]:
```
houston_df[houston_df['RegionName'] == 77541]
```
executed in 31ms, finished 02:01:12 2021-08-08

Out[49]:

	RegionName	City	CountyName	1996-04	1996-05	1996-06	1996-07	1996-08	1996-09	
6457	77541	Freeport	Brazoria	45600.0	45500.0	45400.0	45300.0	45200.0	45300.0	4

1 rows × 270 columns

1.6 Conclusion

Invest in 3 zipcode areas early before the price increase further:

- 77043
- 77018
- 77541

1.7 Next Steps

- Test time series with model using Facebook prophet
- Get another dataset looking the years in which historical oil prices are listed. Houston is known as an "oil industry" city. Would be interesting to see impact on home prices
